

HARIS RASHID

Software Engineer

Lahore, Pakistan | 0321-438-5757 | haris.rashidch@gmail.com | linkedin.com/in/haris-rashid- | github.com/haris-rashid01 | leetcode.com/u/Cs55ruSze4 | haris-liard.vercel.app

SUMMARY

Software Engineering graduate and Associate Software Engineer with hands-on, production experience across the MERN stack (ReactJS, NodeJS, Express, MongoDB), PostgreSQL, Next.js, React Native, and Python. Proven track record shipping production-grade REST APIs, performance-optimized web applications, and full-stack platforms — from ERP systems and construction-industry directories handling 1M+ records to real-time chat and e-commerce apps with payment integration.

TECHNICAL SKILLS

- **Languages & Frameworks:** ReactJS, Next.js, NodeJS, Express.js, React Native, Redux, React Query, Python, Django, FastAPI, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MongoDB
- **Tools & Platforms:** Git, GitHub, Postman, n8n, Stripe, Zod, React Helmet, Socket.io, Firebase, WordPress (Headless CMS), Render, Vercel, Railway, Hostinger CyberPanel, Figma

WORK EXPERIENCE

Fusion Cortex — Associate Software Engineer

Oct 2025 – Present

- Delivered 7+ production web applications spanning marketing sites, ERP systems, and construction-industry platforms, writing clean, production-ready code across the full stack.
- Built ContractorList, a contractor directory platform, owning features end-to-end from authentication to internal admin dashboards; built 40+ REST APIs and integrated Redux for state management.
- Engineered server-side pagination for a contractors directory serving 1M+ records, and improved the page's performance score from 49 to 90+ using lazy loading, React.memo, and useCallback.
- Contributed to a 6-module ERP system — including CRM, HRMS, Recruitment, Project Management, and Employee Tracking — using React Query for server-state management; built 30+ REST APIs for the platform.
- Built and maintained 100+ REST APIs, testing and debugging endpoints in Postman with custom headers and payloads; enforced request validation using Zod.
- Implemented dynamic SEO using React Helmet and integrated a headless WordPress CMS for content-driven SEO handling.
- Worked on 2–3 Next.js projects leveraging SSR for SEO best practices; migrated a client-side React site to Next.js, resolving Google crawler indexing issues and improving search ranking from 40 to 90+.

KnowaTech — MERN Stack Intern

Aug 2025 – Sep 2025

- Built 20+ backend REST APIs (GET, POST, DELETE) following an MVC, production-ready code structure, and added middleware for server-side request validation.
- Improved code reusability and maintainability by ~80% by refactoring components with React's built-in hooks and structured state management patterns.
- Optimized rendering performance using useMemo and useCallback to reduce unnecessary re-renders across the app.

Qwerty Experts — Website Development Intern

Aug 2024

- Hand-built responsive front-end interfaces using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, learning each framework hands-on through direct implementation.
- Focused on responsive design and real user experience across devices during front-end builds.

AppsGenii Technologies — AI Programmer Intern

Jun 2024 – Aug 2024

- Learned to consume REST APIs to call and run trained object detection models, connecting Python/Django backend logic to model inference endpoints.

PROJECTS

Posture Pro — Final Year Project

- AI-powered posture assessment platform making physical therapy more accessible and affordable. Combines AI-driven posture analysis with personalized exercise recommendations, reviewed and refined by licensed doctors. Live Demo: posturepro-frontend.onrender.com

FullStack E-commerce Website

- Full-stack shopping platform with cart, login/signup, order placement, and Stripe payments, plus an admin dashboard for item and role management. Built with ReactJS, Node.js, Express.js, and MongoDB.

FullStack Chatting Website App

- Real-time chat application with private messaging, group chats with member management, and image sharing. Built with ReactJS, Node.js, MongoDB, and Socket.io.

Bite Box — Food Delivery Mobile App

- Mobile application development course project with a modern design and seamless functionality. Built with React Native, Firebase, and Sanity.io.

EDUCATION

COMSATS University Lahore — BS Software Engineering (Graduated)

2022 – 2026

GC University Lahore — FSc. Pre-Engineering

2020 – 2022

St. Anthony High School — Matriculation

2018 – 2020

ADDITIONAL INFORMATION

- **Languages:** English, Urdu | LeetCode: 100+ problems solved
- **Awards & Activities:** Website Head at RAS COMSATS; Event Member Appreciation Certificate, ACM; Gold Medal & 1st Position, Dar-e-Arqam Hifz-e-Quran
